In re Application of: Shelest et al.
Serial Number: 10/010,352

Petitioner, through its attorneys, hereby disclaims, except as provided below, the terminal part of the statutory term of any patent granted on the present application that would extend beyond the expiration date of the full statutory term defined in 35 U.S.C. § 154 to § 156 and § 173 of any patent granted on U.S. Patent Application 09/833,922 (hereinafter "the co-pending application"), as shortened by any terminal disclaimer filed prior to the grant of any patent on the co-pending application. Petitioner, through its attorneys, further agrees that any patent granted on the present application shall be enforceable only for and during such period that its legal title is the same as the legal title to any patent granted on the co-pending application, this agreement to run with any patent granted on the present application and to be binding upon the grantee, its successors, and assigns.

In making the above disclaimer, Petitioner does not disclaim the terminal part of any patent granted on the present application that would extend to the expiration date of the full statutory term of any patents granted on the co-pending application, as defined in 35 U.S.C. § 154 to § 156 and § 173, in the event any patents granted on the co-pending application terminate prior to the expiration of their full statutory terms as presently shortened by any terminal disclaimers filed prior to the grant of any patents granted on the co-pending application. Examples of such non-applicable termination of any patents granted on the co-pending application are as follows: (1) any patents granted on the co-pending application expire for failure to pay a maintenance fee, (2) any patents granted on the co-pending application are held unenforceable, (3) any patents granted on the co-pending application are found invalid by a court of competent jurisdiction, (4) any patents granted on the co-pending application are statutorily disclaimed in whole or terminally disclaimed under 37 C.F.R. § 1.321, (5) any patents granted on the co-pending application have all claims canceled by a reexamination certificate or reissuance, and (6) any patents granted on the co-pending application are, in any manner, terminated prior to the expiration of their full statutory term as presently shortened by any terminal disclaimer.

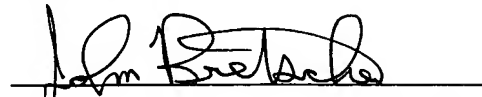

In making this disclaimer, Petitioner reserves the right to extend the term of any patent granted on the present application for a period of delay, in the event the delay is defined by statute or regulation as allowing, or providing for, an extension of term. This right is reserved in the event any patents granted on the co-pending application terminate, or do not terminate, prior to the expiration of their full statutory term. Examples of such a delay include regulatory delay and delay due to appellate review.

The undersigned is empowered to act on behalf of the Petitioner.
